OUR TREATMENTS

Enhancing your natural beauty

MEDICARE COSMETICS

dedicated to aesthetics

Why Medicare?

Our aim is to bring you the highest standard of service and equipment possible. Our team includes; an educator and technicians that hold diplomas of excellence in cosmetic and medical tattooing, level 4 laser and IPL technicians that have broad experience in anatomy and physiology who offer the most advance techniques of laser hair removal and IPL treatments. Technicians that are qualified in advanced beauty therapy level 2-4 and other higher level educators in the beauty sector who, using their advanced treatment knowledge, not only offer exceptional treatments but continually raise the standards of the treatments within the clinic. We are also proud holders of contracts with James Cook University Hospital, performing medical and cosmetic tattooing treatments.

Who we are

Medicare Cosmetics Ltd was set up by Emma Holmes, her aim being to offer treatments in a clinical, professional environment that provide exceptional results every time. Medicare Cosmetics operates from a clinic in Redcar in the North East. The Medicare team consists of highly qualified and experienced technicians who hold higher level qualifications in skin rejuvenation, Cryotherapy and RF Microneedling to name a few. They have a wealth of knowledge and skills to carry out our extensive range of up to the minute aesthetic and rejuvenation treatments ensuring that Medicare has continuing excellent client care.

What we do

The services we provide have been picked especially to suit different cosmetic, rejuvenation and medical needs. Our procedures aim to enhance clients natural features, improve the quality of clients skin and also boost their confidence.

Book your FREE consultation today to receive bespoke advice from one of our technicians. Consultations are always in-depth and informative. It is important to us to provide clients with the knowledge to make an informed decision before going ahead with their treatment.

A TEAM YOU CAN TRUST

MESOTHERAPY FACIALS

We believe that everyone deserves beautiful skin for life. This is our mission and it is simple. Here at Medicare Cosmetics we know that skin rejuvenation isn't a 'one size fits all' scenario. We tailor our facials to suit each individual client. We use different medical grade mesotherapy products on client's which are bespoke to their treatment plan in order to maximise results.

Please note that the price may vary depending on the skin specific products that are used.

MesoDerma Glow Facial - From £100

MesoDerma Glow is a powerful result driven facial, making it the ultimate skin rejuvenation facial. This 8-stage treatment is not an express facial, your skin will be transformed through the process of micro needling, using pharmaceutical grade Mesotherapy products. This facial has anti-aging properties that helps reduce fine lines and wrinkles, whilst applying an immediate hydration action. Not only does this treatment give long-lasting effects, while tightening, brightening and firming, it's also amazing for acne, rosacea and pigmentation.

The MesoDerma Glow Facial is a medically inspired facial using a range of state-of-the-art procedures, techniques and technologies. The 8 stages work on different layers of the skin to kick-start its metabolism as well as to exfoliate, detox, regenerate, hydrate, and supercharge it with essential vitamins and peptides.

What is included?

- Deep cleanse
- Steam
- Dermaplaning
- Chemical Peel
- Micro-needling
- Cryoglobes
- LED Mask
- Skin Specific Mask

Intense Cellular Fusion Facial - £90

Intense Cellular Fusion is an effective results-driven 5 step skin rejuvenation facial. A combination of microneedling and mesotherapy products makes this a 5-star facial for those who are wanting to give their skin an overhaul.

What makes this treatment so amazing is its versatility because of the different range of products that we can use to target different skin complaints by micro needling them into the face, pushing them into the deeper layers of the skin for long lasting results. During this facial we use the most advanced range of skin specific chemical peels which accelerate skin rejuvenation. Chemical peels purify and oxygenate the skin while reducing the appearance of acne, pigmentation and signs of ageing to name a few of the benefits.

What is included?

- Deep Cleanse
- Dermaplaning
- Chemical Peel
- Micro-needling
- LED Mask OR Cryoglobes

TRAINING COURSES

Payl8r Available

Our specially designed training courses have been created to administer you with a wealth of knowledge and skills to provide exceptional treatments to your very own clients. Our courses are ABT Accredited.

Microblading (1 day) - £900

This training is suitable for trainees who are completely new to the industry or tattooing or brow design.

Dermaplaning (1 day) - £199

You will learn how to exfoliate the skin safely and effectively by gently dermaplaning the outer layer of dead skin and vellus hair.

Anatomy & Physiology (Online) - £150

You will gain knowledge and understanding of anatomy of the hair and skin, facial muscular and skeletal systems, as well as veins, arteries, and the lymphatic system.

Microdermabrasion (1 day) - £200

You will learn how to safely and effectively use a microdermabrasion machine to exfoliate the skin.

Why our courses?

All our courses include at home pre-study so that our trainees can work at their own pace before coming in for their practical day filled with treating live models. There will never be more than 2 trainees to 1 tutor.

To find out more about our training courses and any pre-requisites please call us on **01642 481734** or email **info@medicarecosmetics.co.uk**.

Download our detailed brochure from our website **www.medicarecosmetics.co.uk**

IPL (INTENSE PULSED LIGHT) LASER TREATMENTS

Hair Removal

Laser hair removal offers a long-term solution to unwanted or excess hair for both men and women and is suitable for most areas of the face and body. A course of treatments is recommended for the best hair reduction result.

Acne

Acne can be effectively treated with IPL alone or in combination with other clinical treatments. IPL treatments greatly reduce the number and severity of active lesions, lessening the inflammation and frequency of breakouts.

Pigmentation Marks

Pigmentation can occur for a number of reasons and can include freckles, age spots and sun damaged skin. Some can be a natural occurrence as we age. From the age of 40 the skin is less able to regenerate from sun exposure and age spots begin to appear as a result. Pigmented lesions such as sun spots and freckles can be successfully removed with IPL creating a more flawless, youthful and glowing appearance.

Skin Rejuvenation

Treatments can include collagen stimulation, wrinkle improvement and skin tone improvement. Skin rejuvenation treatments offer a solution for all the visible signs of ageing caused by sun damage, such as brown spots, redness, uneven skin texture, lines and wrinkles.

Vascular Treatments

These include rosacea, thread veins, flushed skin and leg veins. Depending on the lesions, leg vessels can also respond well to treatment.

Treatment Plan

On average a course of between 8-12 treatments can be needed depending on your skin and hair colour. Free consultations are required.

Price Per Treatment

Facial Hair Removal

Between brows	£20.00
Chin	£25.00
Top lip	£20.00
Neck	£35.00

Full face	£49.00
Half face	£30.00

SEMI PERMANENT MAKE-UP & MICROBLADING

Semi permanent or 'permanent' make-up is a micropigmentation treatment performed using organic pigments. These treatments all fade over time and will require six month/yearly enhancing.

Eyebrows

Eyebrow tattooing is becoming increasingly popular amongst women and men of all ages. Eyebrows are known for framing and lifting the face, giving a more youthful appearance. Eyebrow styles vary depending on the client's individual face shape, skin tone, age and hair colour. All eyebrows tattooed are bespoke to each client.

Eyeliner/Eyelash Enhancement

Eyeliner is commonly known for smudging and fading, achieving a perfectly crisp line every time can be challenging. Our eyeliner treatments can provide these results for you with minimum effort required in the mornings! Eyeliner tattooing defines, perfectly shapes the eyes and helps to thicken the appearance of the lashes. Alternative to eyeliner, eyelash enhancement is through the lashes, creating a more natural appearance. We have a wide range of colours to suit everyone and compliment an individual's eye colour.

Lip Liner and 'Blush'

Lip liner and blush adds definition, a burst of colour and a plumper appearance to your lips - this is a great alternative to dermal fillers. Lip liner and blush creates a crisp, defined lip line. As we age, our lips become thinner and lose their natural colour - this treatment restores the youthful look back to your lips. We have a wide range of colours that you will be able to select from with your technician on the day of your treatment.

Semi Permanent Make-up Removal/Correction

Only too often have we been asked to correct someone else's work. Semi permanent make up removal can usually be achieved using medical dry needling using salt and saline - which is a non-laser technique commonly used to lighten and remove SPMU

You will be required to have a free consultation prior to any treatment undertaken, so that we can advise what option would be most effective for you. Sometimes only a partial removal is needed.

Beauty Spots

Beauty spot tattooing is a great way to save yourself pencilling and worrying about smudging with the correct placement. This unique treatment is one which can enhance an area of your face.

We are not able to tattoo over moles, your technician can give you advice on placement and size on the day of your treatment.

Scalp Tattooing or Camouflage

This treatment is ideal for men and women who suffer from different types of hair loss or areas of the scalp that can no longer produce hair. This lasts 3 to 5 years.

This treatment involves tattooing the scalp (to create a shaven hair look), the hairline, or particular areas of the scalp to disguise thinning hair or hair loss to create a denser appearance to the hair. This treatment can also be used to treat scarred areas of the scalp. Finance Payment options available.

AESTHETIC TREATMENTS

We offer a wide range of aesthetics treatments. Over time our faces age and everyday movements leave their mark.

Our skin also loses its contour and plumpness. All treatments will be carried out by our fully qualified aesthetic practitioner.

Line Relaxing Treatments - From £120

This is a prescription only non-surgical treatment and will only be carried out following a full consultation. Botulinum toxin is a protein which works on the activity of muscles. This reduces muscle activity softening static lines and can prevent any further lines forming. Results are temporary and skin will return to its prior state once the effects have worn off.

Profhilo/Syniro - From £220

This relatively new treatment is described as an injectable moisturiser. Areas that can be treated are face, neck, hands, décolletage (cleavage) and arms.

Thread/Cog Lift - From £180

A non-surgical thread lift. This treatment restores the volume of fullness to the face. It works by reducing or eliminating lines, wrinkles, folds in the skin and tightens the skin.

Rhinoplasty - £120

Injecting dermal filler under the skin to change the structure of the nose. Perfect for those who want to smooth out bumps or make it less angular.

Dermal Fillers - From £100

The dermal fillers used are made from hyaluronic acid. The fillers are used to contour the face and restore lost volume which also hydrates the skin.

Lip Fillers

Used to define the lip line (border) of the lip and restore / create volume in the lip.

Nasal Labia

The lines or deep creases from the nose to the corners of the mouth.

Marionette Lines

The lines from the corner of the mouth to the bottom of the chin.

Peri Oral (smokers lines)

To plump out fine lines across the top of the mouth, caused by smoking/ageing.

Chin

Deep creases and even dimples can develop on our chin over time. Filler can be used to bring back fullness in these areas.

Cheeks

Dermal fillers to the cheeks can restore lost volume that depletes with age and contour the face.

Jaw Line

Filler can define the jaw line and eliminate jowls.

We have a range of different fillers that we can use.

GLOBAL EYECON

Say goodbye to dark circles, under eye bags, drooping eye lids and fine lines.

This treatment is used to fight the signs of ageing and fatigue in the eye contour area. This professional treatment corrects wrinkles, under-eye bags and circles, sagging and pigmentation in the periocular (eye) area.

A course of 6 treatments are needed with 1 treatment being every week. The treatments consist of 3 alternate peeling sessions with 3 sessions of micro-needling, pushing in active ingredients to the deeper layers of the skin.
£70 per treatment.

CRYOPEN

Cryopen is an advanced cryotherapy innovation that is a fast, effective, safe and new solution for removing skin imperfections. CryoPen offers the ideal treatment for removal of:

- Skin tags
- Sun / Age spots
- Millia
- Warts
- Cherry Angioma (Blood Moles)
- Viral Verrucae

BEFORE

AFTER

Price - £30 per cartridge

DERMX LUXURY DERMAPLANNING

Dermaplaning is the controlled scraping of the skin using a surgical blade. The purpose of this treatment is to remove dead skin cells and fine hair. This treatment is a highly effective exfoliation as it 'shaves' the outer layer of dead skin whilst removing 'fluffy' hair.

Benefits

- Exfoliating
- Removes outer layer of dead skin
- Removes fine and fluffy hair
- Hair does not grow back darker or thicker
- Reduces the appearance of fine lines and acne scars
- Any skincare applied will be absorbed completely due to the removal of dead skin and hair

£40 per treatment

BOOK A FREE CONSULTATION

HELPING SKIN IMPERFECTIONS

LIPO CONTRAST

Lipo Contrast Body Sculpting

The most advanced, non-invasive CryoLipo treatment

What is LipoContrast?

Lipo Contrast is a new medical grade body contouring treatment based on advanced Cryothermal technology. This treatment creates rapid results by heating, cooling and heating the fat cells, resulting in the removal of body fat without damage or invasive methods.

33% of treated fat tissue will be eliminated and gradually breaks down through the metabolic system. This procedure is also a cellulite reducing treatment. Around 80% of the final result will be visible in around 20 days.

Lipo Contrast can target large or small areas such as the flanks, upper and lower back, thighs, knees, arms and double chin through multi sized applicators. Other areas may be available on request.

The advantages

1. Faster and superior fat reduction compared with normal cryolysis procedures.
2. Increased effectiveness on fibrous fat.
3. Avoids traumatic experiences of invasive treatments such as liposuction.

Body contouring

£30 per area

BODY LIPOLYSIS

Body Lipolysis targets smaller deposits of fat on specific parts of the body. You may be a good candidate if you have fatty tissue on your abdomen, hips, thighs, or buttocks that you wish to get rid of.

It is intended for the reduction of localised fat areas or deposits and is an alternative to invasive fat removal surgeries. We estimate up to 1cm of the fat layer in the localised area is lost per treatment. We cannot guarantee your specific results as this is based on the specific client. The fat breakdown will continue for 3-4 weeks after treatment.

Price on consultation.

MESOTHERAPY

Mesotherapy is a highly effective skin rejuvenating treatment that delivers nourishing substances including vitamins, amino-acids and minerals to the layers of the skin where cell repair and growth occurs. It is a safe, natural alternative to invasive cosmetic procedures and is ideal for overall anti-aging, reducing the appearance of fine lines and wrinkles, helping with elasticity and skin tightening and improving hydration levels in your skin, making a positive impact on your skin at the core.

Mesotherapy can be applied to the whole face, neck, chest or hands, leaving skin immediately feeling healthier and radiant. The Mesolift process involves a series of extremely superficial micro needling injections to the epidermis which allows for transportation of the products to the dermal layer where cellular interaction takes place. The substances and products we use are delivered by the Medical grade Pistor Eliance Mesotherapy Gun, which offers the most comprehensive injection menu settings available in the present market.

Using this amazing piece of equipment we deliver vitamins, minerals and amino acids that decrease as we age, making this the ultimate skin rejuvenation treatment.

Benefits of this treatment:

- Fine lines and wrinkles
- Improves skin hydration both at surface and in deep layers
- Anti-aging
- Elasticity and skin tightening
- Brightens skin tone
- Long lasting moisturising effect
- Optimising results
- To achieve beautiful radiant skin and client skin goals
- To provide specific solutions for individual problems
- Leave with your skin feeling healthier

Mesotherapy for Hair Loss

This is a natural alternative to invasive cosmetic procedures and is ideal for clients with alopecia multi factorial, for thicker and fuller hair after weakness or stress, hair loss through thyroid problems, hormonal hair loss and none pathological hair loss. The products we use increase the anagen phase and reduces the telogen phase of the hair growth and loss cycle as well as promoting new hair growth.

Mesotherapy for Face

Mesotherapy replaces these naturally occurring vitamins and nutrients resulting the skin luminescent, hydrates, nourished and firmer with an improved texture. The product line we used is designed to provide deep and long-lasting results.

Mesotherapy for Acne

Mesotherapy for Acne has strong antibacterial, antioxidant, anti-inflammatory and estrogenic effects which is useful for treating acne. This treatment can reduce acne scarring and eliminate bacteria that causes breakouts.

Mesotherapy for Firming

The Mesotherapy for Firming treatment has long lasting firming and moisturising properties and it is especially recommended for revitalisation sessions, while acting as a 'filler' for superficial wrinkles.

MEDICAL TATTOOING

Medical Tattooing is a progressive form of permanent cosmetics. This technique, once mastered, can be used to treat patients for different kinds of medical conditions by using an implantation technique to imbed pigments into the dermal layer of the skin.

Colours for these particular treatments are chosen carefully and are bespoke to each and every client.

Skin Camouflage

Skin Camouflage is one of the many medical techniques that benefits patients who have skin disorders like Vitiligo or others who may have de-pigmentation of the skin due to an accident, stretch marks or scars that have healed leaving a de pigmentation mark. Skin camouflage does not remove the imperfections, however it improves the aesthetic appearance of such imperfections, leaving patients and clients alike, feeling confident and a little more like themselves again.

Prices from £80

Eyelash Tattooing

Along with scalp micro-pigmentation, eyelash tattooing is a treatment that creates the illusion of eyelashes. After suffering with hair loss, many people feel as though this is an essential procedure, to help open up and re define their eyes. Suffering hair loss in such a visible area can be extremely unsettling for many people, this procedure allows them to rehabilitate their appearance and feel positive again.

From £125

Hair Loss/Scalp Tattooing

Clients who have suffered with hair loss due to certain illnesses, medication or alopecia can benefit from scalp camouflage or scalp micro-pigmentation. Scalp Camouflage is the plantation of medical grade hypoallergenic pigment in to the scalp which can then either be blended in to existing hair to give an illusion of thicker or denser hair or used to create a shaven hair look where there was previously little or no hair at all. This treatment can be important to men and women, helping restore their confidence after suffering with hair loss.

£120 per hour

Deliberate Self Harm (DSH) Scars

Scarring from self harming is something that people feel self conscious about and constantly worry about covering up. We offer treatments which can help soften the scarring and therefore make them less visible. A course of treatments will be recommended to every client depending on the scarring and the area of scarring.

From £60

Scar Camouflage

Can be used to camouflage scars on the face and body to make the scars appear similar to a client's skin tone.

Prices from £80

Syndactyly 'Webbed' Fingers or Toes

We can help disguise 'webbed' fingers or toes by tattooing the area to create the illusion of a 'gap' in between. Using carefully selected pigments and colours, a shadowed look can be created.

From £60 OR £100 per hand/foot

Cleft Lip Rebalancing

Cleft lip and palate are very common conditions. Around one in every 600 to 700 babies in the UK are born with one of these conditions, or with a combination of both. Cleft reconstruction is performed on a daily basis in Britain and achieve fabulous results.

Corrective surgery to the cleft lip or palates can be hugely rewarding and successful. However, scarring is inevitable and is usually always visible right into adulthood. Medicare Cosmetics have procedures that can minimise the visual appearance of these scars.

From £400

MEDICAL TATTOOING

Medical Dry Needling

Multi-trepanic Collagen Actuation (MCA) is a non-surgical and natural way of softening the scars following cleft reconstruction. The treatment involves dry needling that relaxes the area making scar tissue more flexible. The skin can be softened and made more elasticated. An anaesthetic solution is used during this procedure.

MCA works by stimulating the epidermis layer of skin. The dry needling causes inflammation and swelling to the area treated. Fibroblasts produce collagen and elastin begins the healing process causing re-pigmentation to occur.

From £60 per treatment

Areola Tattooing

Areola tattooing; commonly referred to as nipple tattooing, is a micropigmentation procedure which can be used for medical or cosmetic purposes. The aim of this procedure is to improve the cosmetic appearance of the breast by creating as closely as possible a nipple/areola colour that matches the existing nipple (if applicable).

Reconstructive breast tattooing (re-pigmenting) the areola gives a natural appearance to the breast, many clients are referred to us via a scheme we have with the NHS. However, we welcome clients who may wish to have this procedure privately, perhaps after having breast augmentation/uplift surgery or for cosmetic reasons. We can also treat men who have had breast surgery.

Bilateral £200 Single £100 Per treatment

Our practice works alongside James Cook University Hospital in Middlesbrough on a referrals basis. However, clients can make appointments privately.

PEELS AND FACIALS

Here at Medicare Cosmetics we use a range of products by Mesoeostetic. They are the most advanced range of skin specific chemical peels. They achieve an accelerated skin regeneration in a controlled manner for visible, immediate and progressive results.

Glycolic Acid

- Anti ageing
- Unifies skin tone
- Reduces expression lines and superficial wrinkles
- Improves the appearance of lines and grooves in the skin
- Reduces the appearance of superficial acne scars
- Helps with skin flaccidity (sagging and drooping)

- Prevention of skin ageing and fine wrinkles
- Hyperpigmentation
- Skin texture improvement
- Acne
- Post acne injuries
- Large pores and blackheads.

£80

REJUVENATE YOUR SKIN

Radio Frequency Microneedling

Utilising microneedles to puncture the skin's surface can help to improve a variety of different indications such as scars and wrinkles and helps to improve the overall appearance and rejuvenation of skin. Radiofrequency (RF) induces thermal trauma to stimulate neocollagenesis in deep layers of the skin, creating stronger, firmer skin to help with concerns such as wrinkles and laxity. Combine Radiofrequency & Microneedling (RFM) together and you have a dual effect on the tissue for a whole host of textural and ageing concerns such as acne scars, skin laxity, stretch marks, open pores, and wrinkles

Radiofrequency Microneedling targeted treatments:

- Eyebrow lifts for loose skin
- Smooth acne and surgical scars
- Tighten lax skin on the face, neck, chest, hands, and body
- Shrink large pores and improve uneven skin tone and texture
- Smooth fine lines and wrinkles
- Reduce stretch marks

Price on Consultation

BEFORE

AFTER

High Intensity Focused Ultrasound (HIFU)

HIFU creates deep focus points of coagulative necrosis in the deeper layers of skin to tighten and lift them through heat. As the skin's natural wound healing response is triggered, the skin naturally lifts and tightens over time, continually improving up to 12 weeks post treatment. HIFU can reduce lines and wrinkles, crepiness, and laxity. This is amazing for lifting and tightening jawlines, make cheekbones more prominent, reduce under eye bags, and lift brow areas.

HIFU targeted treatment

- Eyebrow lift and eye lift
- Mid-face skin tightening and lifting
- Jawline submental sculpting
- Smooth fine lines and wrinkles around the mouth
- Sculpt the body and reduce stubborn pockets of fat
- Tighten lax and loose skin on the body

Price on Consultation

AFTER

Hydra Dermabrasion Facial

Hydra-dermabrasion is a 6 in 1 dermatological procedure which uses an infusion of medicinal grade products and crystal free exfoliation (the opposite of microdermabrasion). It vacuums out pores and pushes in actives which moisturise, brighten and plump and protect. As its name suggests, it uses the power of water and oxygen to gently exfoliate and hydrate the skin. As part of the facial we use a number of different applicators and heads off the machine to rejuvenate the skin.

£130

MESO+DELUXE DIGITAL COLLAGEN INDUCTION

Meso + Deluxe Digital Collagen Induction is a form of skin needling. Micro-needling works by using micro (small) needles in a small cartridge to create invisible, vertical micro-holes into the epidermis and the top layer of the dermis. As a result, the skin shifts into its natural repair mechanism and starts producing collagen and elastin to repair the micro-perforations. The advantage of micro-needling treatments is that it not only activates cell regeneration, it also enhances the absorption of active ingredients into the skin following the treatment.

Along side the needling treatment we use a range of Cell Biologique products, again choosing which is more suitable for the client.

We also use a range of chemical peels which would be selected after assessing your skin. each peel has its own benefits. For example, the Brightening Cherry Peel is a powerful rejuvenating peel that stimulates collagen while inhibiting uneven skin tone, addressing acne scars, pigmentation and age spots typically found on the face. This peel encourages cellular regeneration while removing dead skin cells. Skin is stimulated encouraging the synthesis of collagen which fills fine lines, wrinkles and acne scars resulting with a softer, smoother appearance.

Products we use

Cell Biologique is an advanced dermatological skincare collection offering corrective solutions for both women and men. It is the most comprehensive medical grade collection offered to the professional skincare market for preparation, post procedure and homecare products.

Our products are clinically tested for efficacy to achieve the results you demand from clinical skincare producing visual enhancement in texture and appearance.

Toner - Amazing for all skin types

Combats accumulation of keratinised skin cells that may clog pores causing comedones.

Jouvance Fountain of Youth

Suffering with - Dehydrated, dull lifeless skin and early signs of fine lines and wrinkles.

Serum: Acne Defence

Skin Type:

Oily / combination / acne prone / active acne / blackheads

Serum: Hydration Boost

Skin Type:

All / mature / dehydrated / post-surgical / sun damaged

Serum: Jouvance Intense

Skin type:

All skin types

£80 per treatment

FIBROBLAST

Fibroblast is a skin lifting and tightening procedure which is non-surgical and non-invasive and performed using a handpiece.

An electrical arc is transmitted through a small probe; the probe does not touch the skin. The arc causes superficial damage to the upper dermal layer of the skin and transmits heat to the lower levels of the skin. This causes the new skin to generate collagen and elastin fibres which we can lose as we age.

This treatment is extremely successful and renowned for the improvement on the eye area, specifically upper and lower lids and crows feet. The excellence of the Fibroblast is not limited to the eye area - the neck, jawline, upper and lower lip, mouth area, jowls and forehead can all be tightened and lifted with this treatment.

Upper eyelids	£200
Lower eyes	£200
Stomach/stretch marks	POC
Crows feet	£150

MESOESTHETIC KITS

When having any skin rejuvenation treatments in our clinic, we always recommend using the correct skincare products before and after your treatments. This is so that we can accelerate the results and maintain and prolong the results. The use of these prep kits is so that when we come to performing treatments it allows more even penetration of treatment and encourages cell turnover. It introduces the skin to quality led ingredients.

Each kit is £125

AGE KIT - Brightening Foam, Resurfacing Peel Booster, Collagen 360 Essence, Light Water Anti-Ageing Veil SPF 50+

ACNE KIT - Purifying Mousse, Acne One, Collagen 360 Essence, Mineral Matt Antiaging SPF50+

DEPIGMENTATION KIT - Brightening Foam, Brightening Peel Booster, Ultimate W+ Essence, Melanin 130, and Pigment Control.

SENSITIVITY TESTING

John Neal has been providing allergy testing since 1997 and has test people of all ages at several locations throughout the north east of England, with a non-invasive test. The test does not take blood, scratch the skin surface, or inject anything into your system.

John uses a machine which tests the body's resistance to foods whilst checking the vitamins and minerals shortages, and food sensitivities in the body. The system works on the theory of utilising the acupuncture pressure points on the fingers to measure resistance in the body to substances (foods, airborne, drinks etc) which can be the root cause of problems in everyday life.

Test	Including
Food Test - £25	126 items including 18 e-numbers. Includes coffee, dairy, fish, fruit, grain, herbs, meat, spice, sugar, tea, vegetables
Airborne Allergens - £10	27 items including bacteria, dust, hair, mould & pollen
Food, Vitamin & Mineral Deficiencies - £40	Coffee, Dairy, Fish, Grain, Herbs, Meat, Spice, Sugar, Tea, Vegetables Including: - 14 vitamins, 23 minerals and Candida level Covering the most common food sensitivities and checking vitamin and mineral shortages.
